New Delhi

Summary

Highly motivated and results-driven B.Tech student with a strong foundation in computer science and a passion for web development. Proven leader and event organizer with experience promoting coding culture and mentoring peers. Adept in modern web technologies, including React.js, and proficient in data structures, algorithms, and AI project development. Seeking to leverage technical skills and leadership experience in a challenging role.

Education

B.Tech in Computer Science Engineering

Jamia Hamdard | New Delhi, India *Expected Graduation: 2027*

Experience

Campus Mantri | *GeeksforGeeks June 2025 – Present*

- Led initiatives to foster a vibrant coding culture on campus, organizing and executing workshops, coding competitions, and guest lectures.
- Mentored over 50 students, guiding them on data structures, algorithms, and competitive programming, resulting in improved participation and performance in tech events.
- Collaborated with university faculty and external organizations to host large-scale hackathons and technical events, enhancing the institution's tech reputation.

Web Developer Intern | *Pizeonfly Pvt Ltd Sept 2024 – Oct 2024*

- Optimized website performance and user experience by implementing best practices in HTML, CSS, and JavaScript, reducing load times by 15%.
- Deployed multiple web applications to production environments, ensuring seamless functionality and accessibility across different devices and browsers.
- Improved client satisfaction by actively contributing to the development of new features and maintaining existing projects.

Leadership Roles

- **Joint Secretary**, Ignite Society: Co-led the planning and execution of major campus events, managing a team of volunteers.
- **Team Member**, Google Developer Student Club (GDSC): Organized and facilitated workshops on Google technologies and development skills.
- **Volunteer**, Unnat Bharat Abhiyan (UBA): Participated in community outreach and development projects.

Projects

AI-Based Crop Recommendation System (SIH Project)

- Collaborated in a team to design and develop an AI-powered system that recommends optimal crops based on soil and climate data.
- Utilized machine learning models to analyze environmental factors and provide actionable agricultural insights.

Amazon Clone

- Developed a fully functional e-commerce clone using React.js, implementing core features such as product listing, shopping cart management, and user authentication.
- Managed a persistent user session and cart data using local storage, providing a seamless shopping experience.

Personal Portfolio Website

- Crafted a professional and responsive personal portfolio using React.js to showcase my technical skills, academic projects, and professional experience.
- Deployed the site on a live server, serving as a dynamic platform for potential recruiters and collaborators to explore my work.

Tic Tac Toe Game

- Engineered an interactive and responsive Tic Tac Toe game using vanilla JavaScript.
- Designed the user interface to be intuitive and engaging, ensuring a smooth gaming experience on both desktop and mobile devices.

Technical Skills

- **Programming Languages:** HTML, CSS, JavaScript, C
- **Frameworks & Libraries:** React.js, Flutter (Basic)
- **Computer Science:** Data Structures & Algorithms (DSA)
- **Design & Tools:** Graphic Design Tools (Canva, Figma)

Achievements

- Actively participated and led teams in multiple hackathons, gaining valuable experience in fast-paced, collaborative development environments.
- Made significant contributions to multiple college societies, enhancing event quality and student engagement.
- Successfully took on and executed the responsibilities of a leadership role within the GeeksforGeeks community.
